Career Objective

To work in a challenging software engineering environment where I can apply my knowledge of computer science, continuously enhance my technical skills, contribute to building scalable and impactful software solutions, and grow professionally while supporting the organization's success.

Skills

Programming Languages: Java, Python

Backend Frameworks & Databases : MySQL, MongoDB, Node.js, REST APIs, JWT Authentication

Tools & Architecture: Linux, OpenAPI / Swagger, Postman, Git, GitHub, Microservices Architecture

Projects

KeyLogger – Keyboard Activity Monitoring Tool | *Python, Windows API, Keyboard Hooks, File I/O, Multi-threading*

- Developed a **Python-based keyboard activity monitoring tool** that captures keystrokes in real time using **Windows API and keyboard hooks**.
- Implemented **multi-threading** to efficiently handle real-time keyboard event monitoring without blocking application execution.
- Designed a **file-based logging system** to securely record captured keyboard events for controlled analysis and cybersecurity research.
- Built the project for **educational and cybersecurity research purposes** to understand keylogging behavior, event interception, and potential security risks.

DarkComet RAT Behavioral Analyzer | *Python, Machine Learning, Streamlit*

- Developed a **cybersecurity tool** to monitor and analyze suspicious system behavior related to RAT (Remote Access Trojan) activity.
- Implemented **process, file, and network monitoring** to collect system activity and behavioral data.
- Used **machine learning and threat scoring** to detect and classify anomalous behavior.
- Built an interactive **Streamlit dashboard** to visualize monitoring results and threat analysis.
- Created a safe **activity simulator** for testing and demonstrating the detection system.

Achievements

- Secured **1st Place** in **Techfusion Hackathon**.
- Secured **3rd Place** in a **Paper Presentation** competition.

Education

Dayanada Sagar Academy of Technology And Management (DSATM)

B.E in Computer Science and Engineering in Cyber Security

Bangalore, India

*2024 – 2027 (Current CGPA: **8.06**)*

Kudligi Polytechnic College

Diploma in Cyber Physical Systems and Security

Vijayanagara, India

*2021 – 2024 (Final CGPA: **8.95**)*
